

Jérôme Dhersin

Fullstack Developer Java / Spring / React

Personal Information

- ✉ Email: j.dhersin@hotmail.fr
- 📍 Location: Lille
- 📁 Portfolio: <https://jd-pixel-works.fr/>

Education

- Master's in Computer Science — E-Services (Lille 1)
- Bachelor's in Computer Science (Lille 1)
- Professional Bachelor's EICET (Valenciennes)
- BTS Electrical Engineering (Valenciennes)

Skills

- Java (8, 11, 17, 21) (8+ years XP)
- Spring Boot (2, 3) (8+ years XP)
- React (16, 18) (2+ years XP)
- Next.js (1+ year XP)
- Angular (JS, 2, 4) (2 years XP)
- PostgreSQL (8+ years XP)
- Oracle (8+ years XP)
- Docker (1 year XP)
- Nginx (1 year XP)
- Maven (8+ years XP)
- GitHub Actions (1 year XP)

9 years delivering reliable, fast web applications. Architecture, performance, DX and UX at the heart of every project.

Professional Experience

[L'Agent X] Mission — Supermarché Match

10/2022 — Aujourd'hui
(3 years and 9 months)

Développeur Web — Fullstack

Impacts

- Mentored junior developers; code reviews; pair programming; technical workshops on Java / React and TypeScript best practices.
- Migrated React 16 to React 18; adopted hooks and functional components; improved overall application performance.
- Migrated Spring Boot 2.2 to 2.7; updated major dependencies; improved overall application security.
- Rewrote technical and functional documentation to speed up onboarding.
- Developed a React tool for real-time monitoring of Spring Integration flows.

[UNIS] Mission — Decathlon

11/2017 — 10/2022
(4 years and 11 months)

Développeur Web — Fullstack

Impacts

- Redesigned product price recalculation (Java batch): reduced runtime from 7 to 3 days, improved memory usage and error handling.
- Implemented dynamic configuration for unit and integration tests across modules.
- Provided support/run for production management app (product sheet, orders, stock, stock planning).

[UNIS] Mission — Kiabi

02/2017 — 10/2017
(8 months)

Développeur Web — Fullstack

Impacts

- Improved performance of leave management screen with drag-and-drop calendar interactions.
- Improved product sheet design in the mobile in-store stock management application.
- Provided support/run for Kiabi backoffice applications.

[UNIS] Mission — Lyreco

09/2016 — 04/2017
(7 months)

Développeur Web — Fullstack [Alternance Master 2]

Impacts

- Built supply-chain hierarchy management screen with drag-and-drop and automatic reference recalculation.
- Built mapping screen between supply-chain and web hierarchy with node drag-and-drop.
- Implemented unit tests for both modules.
